The OAAA brand identity

The Outdoor Advertising Association of America, commonly known as the “OAAA”, is a passionate advocate and a progressive thought-leader that protects, unites and advances the interests of the out of home advertising industry. This refreshed identity system provides a dynamic new brand platform to continue this important work.

EXISTING

NEW

The new OAAA brand identity is bold, energetic, and modern. It represents an intentional evolution from the current logo and literally “breaks out of the box” to express the organization’s forward-looking vision, leadership and advocacy.

Brand Assets

The OAAA logo

The new OAAA logo consists of three elements:

- The wordmark of letters rendered in the distinctive Museo Slab typeface.
- The red 'screen' logomark with its white 'O'.
- The descriptor 'Outdoor Advertising Association of America', also rendered in Museo Slab.

Logo clear space

The logo has clear space based on the width and height of the letter 'a'. Make certain to keep all design elements outside of the logo's prescribed clear space.

Logo usage

DO use the approved OAAA logo from the approved logo files.

Outdoor Advertising Association of America

DON'T stretch or skew the logo.

DON'T use a color other than red for the red screen logomark.

DON'T make the entire logo one color unless reversed to white.

DON'T reposition the 'O' inside the red screen logomark.

DON'T use a color other than the specified gray for the wordmark or descriptor.

DON'T fill the 'O' with a color other than white or knockout color black. When used against patterns the 'O' is white.

DON'T use shading or special effects.

DON'T change the wording of the descriptor.

DON'T turn the logo on its side.

The logomark

The red screen logomark may be used alone as an identifying mark and as an icon in a wide range of design applications. The logomark may appear as a flat or dimensional graphic. It must always be rendered in red or knockout white. It always has rounded corners. And the 'O' always appears inside the red screen logomark on the right side, bleeding off of three edges.

Using imagery

Patterns

Two patterns of repetitive red screen logomarks have been developed to use as backgrounds and design elements. Patterns must be used as an all-over, full-bleed pattern and never as contained or stand-alone elements. Patterns must always be rendered in OAAA Light Gray, with the tint and opacity adjusted depending on the application.
